

Dear Colleagues,

The Program Organizing Committee (POC) invites you to join the four international thyroid societies AOTA, ETA, LATS and ATA at the 15th International Thyroid Congress. POC representatives from each society have met annually since 2012 for productive and enthusiastic sessions developing the scientific and clinical program. The POC has created a breadth and depth of thyroid topics, symposia, discussion/debates, and plenaries to appeal to you, as a member of the international community of endocrine specialists, thyroid surgeons and other thyroid health professionals. This is the meeting to attend for all those devoted to thyroid biology and to the prevention and treatment of thyroid disease through excellence in research, clinical care, education, and public health. Don't miss this "top of the mark" collegial event.

International access, beautiful autumn weather and family activities make Lake Buena Vista (Orlando), Florida a great meeting destination for the 15th International Thyroid Congress (ITC) from October 18-23, 2015. Hosted by the American Thyroid Association (ATA), the ITC will present and discuss the latest research and developments in thyroidology. The four sister societies have combined their efforts to contribute to this one of a kind, state-of-the-science experience!

The ATA meeting organization is well known and well regarded in terms of hospitality and logistics: the online registration is reliable and responsive; the hotel reservation system allows all meeting attendees to be confident that a room will be waiting for them upon arrival; the abstract submission and speaker management process is designed with the latest in technology. Registration and meeting program details are available at www.thyroid.org. The social events will be international in flavor and there will be all day access to a sandy beach and water taxis to Disney World®.

We are very excited about welcoming you and your families to the 15th ITC this coming October!
